

“...positively *phunkadelic*.”

Keeley 6-Stage Phaser with **Ramp & Tap Tempo...**

“we’ve created a dreamscape for your pedal.”

Tears of Joy Included at no extra charge

Whether your past experience with phasing effects is rooted in 1970s ‘innovation’ or modern digital pedals, I invite you to experience our new, pure analog 6-stage phaser, meticulously designed to inspire the muse within featuring the most versatile speed, rotation and sound-shaping controls ever offered in a true analog phaser.

Edge Control – One part regeneration depth control and one part envelope filter, the Edge control ranges from a barely perceptible, subtle phasing effect to far-out and spacey.

Ramp Mode & Tap Tempo – Our exclusive phaser speed Ramp Control and tap tempo deliver a panoramic range of switchable speed and rate settings on the fly for maximum versatility.

Dual Speed Controls – Further

expand the versatile range of phased voices with two independent, foot-switchable phaser speeds.

True bypass for zero signal loss, 9 volt battery or DC power, standard Keeley attention to detail and professional construction.
